VisionTEK Demonstrating Advanced Handheld Reporting Software at International Association Chiefs of Police (IACP) Annual Conference

*Visit VisionTEK at Booth 4004 this November 9-11, 2008 in San Diego
and Create your Own Custom Form in Under 30 Minutes*

November 4, 2008—Broomfield, CO—VisionTEK, a leading mobile data solutions provider for the public safety industry, today announced that the company will be exhibiting at the International Association of Chiefs of Police (IACP) Annual Conference and Exposition this November 9-11th. VisionTEK will demonstrate their advanced handheld reporting suite and mobile field reporting software in booth 4004 at the San Diego Convention Center.

"Handheld devices have been in use for a number of years, mainly for citation reporting," commented Frank Traylor, CEO and President of VisionTEK. "Not all agencies can justify the purchase and integration of handhelds for only a single application. Our new Handheld Software Suite extends handheld functionality with more report and form types, increased access to data, and the ability to develop and maintain forms without vendor assistance. Our software makes handheld technology a solid agency investment and a valuable tool for officers. Officers literally have the power of information in the palm of their hand."

VisionTEK will demonstrate the new Handheld Application Suite in addition to their existing product line—FrontLine, mobile data software and field based reporting, and the Radix message switch. The new Handheld Suite offers a number of standard forms such as Citation, Field Interview, Warrant Query, and Report Administration, in addition to The Designer, a form development toolkit for custom forms.

Attendees are invited to see the Handheld Application Suite and FrontLine. Attendees may use the software to complete handheld reports in under 10 clicks or discover how easy it is to create custom forms. Software demonstrations will be held during exhibit floor hours Sunday through Tuesday. Attendees can contact VisionTEK if they require additional hours or would like an individualized demonstration. Appointments can be held in San Diego or via online demonstrations after the conference.

About VisionTEK

Since 1993 VisionTEK has been providing public safety software solutions to first responders for mobile data, message switching, field-based reporting and database integration. Our police reporting software solutions are designed to cost-effectively enable real-time information sharing within or across jurisdictional boundaries via wireless and wired networks. Our platforms are highly configurable and leverage existing infrastructure to increase efficiency and enhance effectiveness of interoperable communications. VisionTEK solutions are deployed in over 200 Public Safety agencies.
